Smo največji proizvajalec fasadnih
štukatur v Sloveniji.

Naši začetki segajo v leto 2003.

Neprestano izboljšujemo svoje
izdelke in se trudimo izpolniti vse
želje svojih strank.

Naše proizvode najdete poleg
Slovenije tudi v Franciji, Italiji,
Nemčiji in Švici.

Zahtevnejše elemente najprej
modeliramo iz gline, lesa ali
3D-printa in iz njih naredimo
odlitke iz posebnih lahkih
materialov.

Ker svoje izdelke tudi montiramo,
vam nudimo celoten sistem, ki
vključuje:

- lepilo za montažo,
- fugirno in izravnalno maso ter
- posebno trajnoelastično
barvo, ki preprečuje razpoke
med posameznimi elementi in
nabiranje umazanije na profilih.
